

# Strategic IT Leadership. Cybersecurity Expertise. Real-World Execution.

Wingman is Refoundry's signature service for organizations that need more than basic IT support. Wingman delivers strategic leadership, deep architectural expertise, and cybersecurity guidance to help you scale, modernize, and stay secure. Embedded in your team, Wingman ensures your business stays secure and aligned with its long-term goals—accelerating execution with increased confidence.

## Why MSPs Fall Short

Most MSPs focus on operational maintenance—solving tickets, monitoring uptime, and chasing surface-level KPIs. They deliver support to maintain the status quo, not solutions or strategy for the future. Their teams are often built around generalists, not the cybersecurity leaders or enterprise architects you need to move your business forward.

## The Wingman Advantage

Wingman is not another layer of support—it's your strategic accelerator, filling the holes left by MSPs or lean internal teams.

- Available as a standalone engagement or to supercharge existing MSP operations
- On-demand access to experienced CIOs, CISOs, solution architects, and engineers who integrate directly with your team

These aren't advisors from the sidelines—they're embedded, outcome-driven professionals who help you close critical skill gaps and drive strategic initiatives from planning through execution.

## Access to Elite Talent for Lean, High-Performing Teams

Wingman is purpose-built for teams who need access to elite talent without bloated headcount.

- Executive-level insight
- Hands-on leadership
- Tactical and timely execution

Our engagements begin with a proprietary orientation process developed through years of experience:

Identify gaps, objectives, and milestones

Enabling targeted strategic action across IT, architecture, and compliance

Prioritized understanding of your security posture

## What Wingman Delivers

Executive-level strategic planning across IT, cybersecurity, and architecture, providing ongoing expert C-suite advisory and support for stretched IT teams.

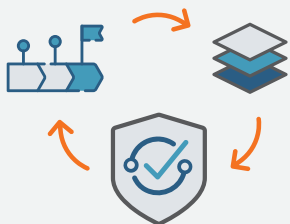

### IT Strategy

- Define IT strategy and digital transformation that aligns IT priorities with business outcomes
- Develop a 1-3 year prioritized IT vision
- Align IT with business goals and user productivity (e.g., AI, SaaS)
- Optimize IT budgeting and costs

### Cybersecurity Strategy Support

- Conduct assessments to identify and develop risk reduction strategy
- Manage risk register and operationalize cybersecurity policies
- Implement awareness training and vulnerability/patch management programs
- Establish a cybersecurity steering committee and support third party audits

### IT & Cybersecurity Architecture Advisory

- Provide architectural guidance for technology stack adoption
- Educate and assist teams in implementing the tech stack
- Review and update the technology roadmap
- Scalable execution guidance for modernization and transformation projects

Wingman transforms IT from a cost center into a strategic advantage. Whether you're navigating compliance, scaling operations, or accelerating innovation—your Wingman is already on board.
